

Install a Viron P300 3 speed Pool Pump to power your filter pump and relax. Infinitely adaptable, these clever motors are kind to the environment and just as gentle on the hip pocket.

Viron is a product of today's thinking and global challenges.

The Viron P300 Pump utilises a state of the art permanent magnet brushless DC motor controlled by advanced electronics to dramatically decrease operating costs, Co2 emissions and noise levels.

Developed in Australia, the patented Viron motor is an example of world leading technology developed to meet today's energy and environmental challenges.

Save Money

Unlike conventional single-speed motor, which routinely work at maximum capacity, the Viron adapts to the task at hand.

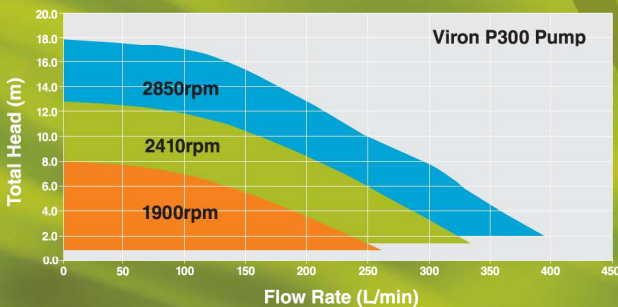

The high energy efficiency of Viron results in a dramatic reduction in power consumption - saving 70% of ongoing operating costs. In fact, over the life of the Viron P300 pump, the energy savings will buy another two Viron Pumps.

Co2 Emissions - Viron P300 v Conventional Pool Pump

Environmental Savings

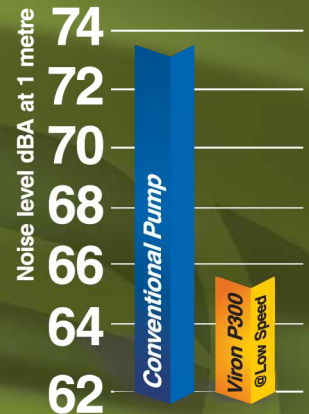

The environmental savings are equally impressive with the Viron saving up to 1 tonne of Co2 per year when compared to a conventional pump. And it's not just all for the global good either.

Noise Reduction

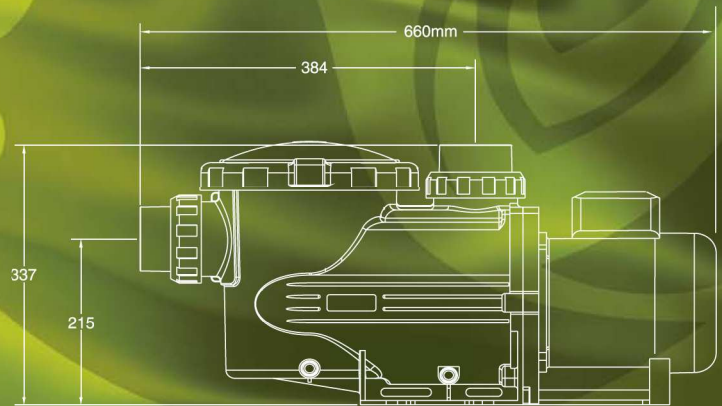

The Viron P300 is dramatically quieter than conventional pool pumps. So quiet in fact, that it allows operation at times simply not feasible from other pumps.

When installed by your authorised Viron Pump Installer, Viron offers even greater advantages:- Reduced chlorinator size, increased sanitiser stability, reduced wear and tear on other filtration plus more efficient cleaning of your sand filter all help your pool equipment last longer and reduce the lifetime operating costs of your pool.

Warranty

Each Viron brushless DC motor is covered by a limited 3 year warranty against defects in materials and workmanship.
