

Laminated Filters Series

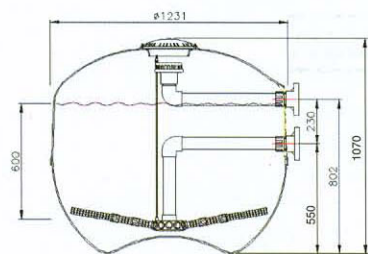

High rate sand filters using the latest European technology
100% filters tested against default
New design with mirror finish

- The finest quality in sand filters for swimming pools: designed and engineered using the latest European technology and machineries,
- High rate tanks in laminated fiberglass reinforced with polyester resin,
- Multiport valves with unique design that offer a reliable service for many years,
- Top sand charge lid with 300 mm diameter equipped with an easy to read pressure gauge and with manual air vent (for side mount only),
- Water purge in the lower part of the filter that facilitates the maintenance operations,
- Fitted with corrosion-proof collectors and diffuser that enhances the capacity of filtration,
- Ideal to use in spas, private or semi commercial swimming pools when high performances of filtration are required.
